

INTELLIGENT TECHNOLOGY SOLUTIONS

Intelligence you can build on.

We build automation, AI and data systems that arrive with their evidence,
so you can run, audit and extend them without us.

NETOGRIT SOLUTIONS PRIVATE LIMITED

hello@netogrit.com • netogrit.com

From your website to your back office.

Digital Products

Websites, web apps and UI/UX; E-commerce, marketplaces and payments

Business Systems

CRM, ERP and custom applications; APIs, integrations and connectivity

AI & Automation

AI solutions and copilots; Workflow automation and process digitisation

Data & Analytics

Data platforms, analytics and dashboards; MIS and reporting

Cloud & DevOps

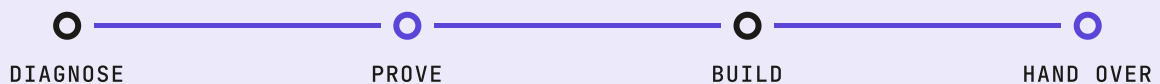

Cloud infrastructure and migration; DevOps, deployment and monitoring

Technology Strategy

IT consulting, product strategy and digital transformation

HOW WE WORK

You accept each gate before the next starts. Fixed price, billed by milestone.

What changed, and by how much.

○ Problem ○ What we built ● What changed

01 • MANUFACTURING • LUDHIANA

WORKFLOW AUTOMATION

A made-to-order furniture maker, 22 years old, two workshops, dealers in nine cities.

- Nobody knew where an order stood without walking the floor, and quote to dispatch ran 34 days.
- One workflow from quote to dispatch, each stage confirmed on a phone by whoever finished it.
- Quote to dispatch 34 days → 25 days. Job cards retyped 120 a week → none.

02 • D2C FASHION • BENGALURU

DATA ANALYTICS & AI INSIGHTS

A five-year-old fashion brand, eleven stores in four cities, three online channels.

- Store, marketplace and website sales sat in three reports that disagreed, and month end took 6 days.
- One data platform over every channel, a dashboard per store, AI flagging what to reorder or move.
- The month-end close 6 days → 1 morning. Report lines that disagreed 1 in 5 → under 1 in 100.

03 • CLINICAL RESEARCH • HYDERABAD

EDC & PATIENT DATA PLATFORM

A twelve-year-old research organisation running trials across forty hospital sites in six cities.

- Paper forms and email meant 12 queries raised per 100 fields, each one chased by hand.
- Electronic data capture: sites enter once, checks run at entry, every change is logged.
- Queries per 100 fields 12 → 2. Query raised to closed 11 days → 2 days.

04 • REAL ESTATE • PUNE

LEAD, SALES & CRM SYSTEM

A 25-year-old residential developer, nine projects across three cities, sixty sales staff.

- Leads from portals, brokers and walk-ins landed in separate sheets, and 1 in 3 went cold unworked.
- One CRM for every lead source: follow-ups assigned and reminded, visits and bookings on one record.
- First response inside a day 45% → 96%. Leads gone cold 1 in 3 → 1 in 25.

WHO YOU WORK WITH

The people behind the work.

The founders, and what each of them decides about your business.

Abhinav Rath

CO-FOUNDER · TECHNOLOGY & ENGINEERING

MCA, CHRIST University

How your systems should fit together, what gets built, and how it keeps running after handover. He writes the code himself.

WHAT WE STAND FOR

Your team, by name

Named in the contract. Nobody is swapped in without your consent.

Every claim is checkable

The measure and today's number, agreed before the build.

Yours from day one

Code, data and logins in your accounts. Never ours.

You can run it without us

Your team runs it live. The review names what we did not fix.

IN EVERY STATEMENT OF WORK

100%

Code ownership at launch

1

Working day to a reply

0

Substitutions without consent
